proven performance in both office and mail room environments.

PS800 PRESSURE SEAL FOLDER SEALER: The new and improved PS800 high-volume pressure seal folder sealer is available with three in-feed options including a jumbo roll feed config-

uration. It is the most advanced and productive pressure seal machine available. Configured as an 18" wide roll or sheet fed format, the PS800 is capable of folding and sealing 80,000 Snap Pak pressure seal mailers per hour. The two-wide formats often result in very significant imaging click savings for print mail installations.

PS600: The PS600 is a commercial-duty pressure seal machine. Its stop load feature and variable speed control ensures steady long term high-volume production. Configured in-line slitter for the two wide DOUBLE POSTCARDS is available ONLY from InfoSeal.

JUMBO ROLL PRESSURE SEAL: InfoSeal's 50" jumbo roll pressure seal forms for high-volume pressure seal installation.

DOUBLE POSTCARD PRESSURE SEAL SELF MAILER: Enjoy tremendous postage savings compared to standard mail formats. InfoSeal has special expertise in this product.

TWO WAY/REMITTANCE ENVELOPE: A pressure seal form with return envelope included.

PINSEAL SECURE SNAP PAK: Proprietary "no view" pin number and pass word mailer.

STOCK FORMATS: Over 50 off the shelf stock formats for any application.

PRESSURE SEAL SELF MAILER WITH A FREE INSERT: A free insert is offered within the sealed form.

DIGITAL PRINT READY: All of InfoSeal's stock formats are perfect for direct mail and transactional mail printed on digital color printers.
