POSTAGE ASSESSMENT

The electronic Induction (eInduction) process streamlines the preparation and induction (how and where the mail physically enters the Postal Service mailstream) of drop shipments and expedited plant load mailings. eInduction links scans from Intelligent Mail Container Barcodes to eDoc information, allowing the Postal Service to verify that postage was paid prior to accepting a mailed shipped container. eInduction eliminates the need for paper PS Forms 8125, 8017, and 8125-CD, and the need for manual reconciliation at the entry facility. Correct postage payment is verified both at the entry facility and during post-induction processing in PostalOne!. eInduction assessments are aggregated at the eDoc submitter CRID level and distributed to the Mailer Scorecard and Mail Entry Postage Assessment reports. For mailers enrolled in the Seamless Acceptance Program, no additional eInduction assessments are charged for containers with Undocumented or Payment Errors. Containers with Misshipped Errors are not assessed for Entry Point Discount and non-numeric Zone Discount Errors.

AUTOMATED ASSESSMENT NOTIFICATION

On the 11th of each month the USPS will identify the eDoc submitters who have exceeded a threshold. The USPS will use the information within a Business Customer Gateway (BCG) user profile to identify the correct company to send the automated assessment email notification. To receive a notification, the eDoc submitter must have a BCG account and the correct combination of user roles and services as shown in the table below.

MAIL OWNER: AUTOMATED ASSESSMENT NOTIFICATION

There may be circumstances where an eDoc submitter chooses to pay a postage assessment using a Mail Owner’s permit. When this occurs, the Mail Owner will be notified through the Automated Postage Assessment notification under the following guidelines:

- BCG account and the correct combination of user roles and services as shown in the table above
- The permit used to pay the postage assessment is linked to the Mail Owner’s BCG profile
