

Mail Openers/Extractors

feathered edge while protecting valuable envelope contents. Even overnight delivery envelopes are no match for the Model 306. Equipped with a robust operator control software interface, job setup can be done with ease and flexibility. Most significantly, the IM-306 is also available with enhanced sorting capabilities as the IM-306s. Envelopes can be output to two locations based on programmable criteria such as thickness, length, and height. Optional batching capability allows items to be grouped together in pre-selected lot sizes. Sorting options make the IM-306s a perfect fit for applications that require verification of contents either before or after extraction like claims processing, remittance, and vote-by-mail. Because of its ability to identify “clean mail” from “exception mail,” it helps to insure maximum productivity from mail extraction equipment by allowing operators to concentrate on extracting contents from “clean” batches instead of trying to handle exceptions at the same time. Features include: Milling cutter, high-speed processing, three mail tray supports, operator controlled software interface, automatic jam detection, automatic chaff collection, stand and waste bin, no sharp edges — no paper cuts.

§ Pitney Bowes Inc.

CATEGORY: Mail Openers/Extractors

PRODUCT: DL Series Letter Openers; Opex 306 Series Letter Openers

COMPANY: Pitney Bowes Inc., 3001 Summer Street, Stamford, CT 06926-0700. Tele: 877-682-7687. Web: PitneyBowes.com

DL SERIES LETTER OPENERS: Pitney Bowes offers 3 solutions to improve your inbound mail opening and sorting processes. The DL50™ is designed for small offices and basic letter opening needs. Its compact design fits right on a desktop or central office location. This manual letter opener accepts a wide range of mail types and can open up to 20 letters per minute. For a more automated, robust solution, Pitney Bowes offers the DL200™ and DL400™ Letter Opener. The DL200 Letter Opener has the ability to automatically open up to 250 letters per minute. It handles mail pieces of varying dimensions and thickness while ensuring operator safety with its shielded cutting mechanism. The DL400 is a high speed letter opener that automatically opens up to 400 envelopes per minute with quick, easy and clean operation. No jogging or tamping of mail is required. The unique milling design helps protect the contents of incoming mail including your receivables, donations, business reply mail and returned forms.

DL Series Letter Openers

OPEX 306 SERIES LETTER OPENERS: Pitney Bowes now offers a fourth solution to improve your inbound mail opening and sorting processes. The Opex 306 and 306S are designed for high volume mailrooms that require speed and flexibility. Its improved milling cutter removes chips as small as 0.25mm from the envelope edge for safe and secure extraction. Plus, the new operator control software allows for optimal flexibility and simple job setup. With breakthrough speeds up

§ Advanced Poly-Packaging, Inc.

CATEGORY: Mail Order Fulfillment Systems

PRODUCT: T-1000 Mail Order/Fulfillment System

COMPANY: Advanced Poly-Packaging, Inc. 1331 Emmitt Road, Akron, OH, 44306. Key contact: Paul Orosz. Phone: 800.754.4403. email: sales@advancedpoly.com

DESCRIPTION: Add automation to your mail order/fulfillment center with this horizontal system. Scan packing slip and place product(s) onto

Advanced Poly Mail Order 5

the load shelf or adjustable conveyor. Slide product into open bag that is then automatically sealed and conveyed to a bulk shipping container or other destination. Custom Advanced Poly-Bags are available using exclusive “Mailer” film to protect product. Patented “Next Bag Out” printing practically eliminates mislabeled bags, perfect for an industry that requires a different label on almost every single bag.

The Light Safety Curtain is designed to protect employees by disabling the machine’s ability to heat seal a bag when the device detects anything that crosses the threshold. The Ti1000Z Inline Thermal Transfer Printer will quickly and accurately print anything from a simple address to full color logos. The T-1000 includes a large full color touch screen control center, a generous warranty and nearly all parts available off the shelf!
