Parcel/Mailbox Lockers

§ Neopost USA

CATEGORY: Parcel/Mailbox Lockers
PRODUCT: Packcity Intelligent Parcel Lockers
COMPANY: Neopost USA, 478 Wheelers Farm Rd., Milford, CT 06461. Phone: 800-NEOPOST (636-7678).
DESCRIPTION: Packcity Intelligent Parcel Lockers are an automated electronic locker system that securely stores packages for easy consumer retrieval. They are the most convenient solution for customer deliveries at universities, corporations and other locations and make it easier for people to pick up packages on their schedule.
HOW IT WORKS: Having Packcity intelligent lockers alleviates crowded mailrooms and eliminates multiple delivery attempts. Consumers can pick up packages on their time — anytime. A delivery notification is sent via text or email when the parcel arrives. The recipient enters their one-time PIN code, the door opens for recipient to grab their parcel and go.
FEATURES: Packcity Parcel Lockers offer total security of packages and risk reduction of lost packages; complete tracking and accountability with a log of every package drop off and pick up – 100% chain of custody; reduction of labor and time with fewer resources required to deliver packages to lockers only and not having to drop off at every desk, station, etc. (labor savings can justify cost of system); eliminates the need for multiple deliveries and re-delivery attempts; signature no longer required, electronic log record alleviates this; 24/7 convenient access; your choice of email or text notification to receive passcode.

Parcel Mailing/Sorting Systems

§ Advanced Poly-Packaging, Inc.

CATEGORY: Parcel Mailing/Sorting Systems
PRODUCT: US-6000 Check-Weigh; BF-4000 Box Filling System
COMPANY: Advanced Poly-Packaging, Inc., 1331 Emmitt Road, Akron, OH 44306. Key Contact: Paul Orosz. Phone: 800-754-4403. Email: sales@advancedpoly.com.
DESCRIPTION: Accurate shipping weight is the final checklist item before your package is sent to its destination. Our check-weight system is accurate within 5 grams. It is designed for cartons 3” x 3” to 18” x 24” and weighing up to 50 lbs. that are typically fed from a box taper. The package is weighed, then fed onto a roller. A pusher assembly pushes the carton that does not meet the desired weight to the gravity reject roller conveyor. The belt and roller conveyors can be customized.
BF-4000 BOX FILLING SYSTEM: This side-by-side automatic box filling system takes pre-made boxes and feeds them from a belt conveyor onto a loading station. Once filled, they are released on a return roller conveyor. The BF-4000 easily ties in with other infeed equipment such as conveyors, bagging machinery and rotary scales. When a carton is full, an accumulator closes above the carton allowing continuous feeding, while the next empty carton is fed into the loading position.
CONTACT: For more information, call 800-754-4403 or email sales@advancedpoly.com.

§ BÖWE SYSTEC North America Inc.

CATEGORY: Parcel Mailing/Sorting Systems
PRODUCT: OptiSorter
COMPANY: BÖWE SYSTEC North America Inc., 8480 Honeycutt Rd, Ste 200, Raleigh, NC 27615, (919) 714-7277 or email address: Generalinquiries@bowesystecinc.com
OPTIMUS SORTERS: BÖWE SYSTEC’s New OptiSorter Parcel and Package Sorting solutions address the complexities and demanding requirements of the package, parcel and logistics sector with material handling automation, weighing, scanning, dimensioning, print/apply labeling and sorting for a variety of industries including, Postal and Parcel sortation and Inbound/Outbound logistics. The solutions are designed to handle a wide variety of product types and dimensions with systems that are fast, flexible and scalable to match operational objectives. The unique pusher tray technology is designed for sorting a large range of different product sizes and shapes including parcels, poly bags, cartons, books, multimedia, containers, apparel, shoes, and agricultural items. It enables the sortation of items as small as 1/16” thick and as large as 65 lbs. with speeds of up to 15,000 trays per hour.
FEATURES: The modular design allows for customized sorter layouts to optimize floor space and workflows including elliptical and

BÖWE SYSTEC OptiSorter Parcel and Package Sorting Solutions

straight-line, single and multi-level, and dog leg configurations. The number of chutes is unlimited with multi-directional sortout available to minimize flow space requirements. The sorters are available with manual and automatic induction to maximize productivity and the robust BÖWE Sort software platform for inbound inventory management as well as outbound order fulfillment, tracking and parcel co-mingling. A variety of chute designs are available to sort directly into gaylords, carts and bags or efficiently for palletizing and order fulfillment. The flexible designs are competitively priced, translating into an immediate return on investment by saving labor, saving time and increasing accuracy. BÖWE SYSTEC acquired a majority ownership position of Optimus Sorters in 2016 and our long standing strength and experience in complex, intelligent material handling systems makes these new products a perfect fit for our portfolio of solutions.

EZ-WORKDESK SYSTEM DESCRIPTION: The EZ-WorkDesk is geared for automated parcel processing – featuring IMpb (Intelligent Mail Package Barcode) compliance, an OCR, and laser dimensioning. This versatile mailroom application is the most cost effective solution for rapid induction into the USPS package shipping network. Features include: OCR technology enables rapid Intelligent Mail Package Barcode (IMpb) production for new USPS specifications; Configurable Wide Area Bar Code Reader captures up to five separate barcodes on a single package; Dimensioning feature captures length, width, and height for USPS Cubic packages and other Dimensioning requirements. Leveraging its industry leading technology for “reading” mail piece information, the EZ-WorkDesk Parcel Processor features best of class capability for collecting package information. Data from the four key package characteristics – address, dimensions, barcode intelligence, and weight – are pulled off the package simultaneously. The Software immediately interprets package data set for labeling, routing, postal documentation, and customer billing.

Low Volume Configuration: EZ-Flats™ Essential Manifesting System:

The introductory model for the EZ-Flats™ System, Essential, is geared for daily runs of 500-2000 flats. This version enables mailers with lower flats volumes to achieve high levels of profitability with a low initial capital outlay. As volumes increase, users can directly upgrade to the Enhanced or Premium models, as described below. The Essential solution features best-of-class OCR technology and works with Parascript™ and/or RAF Platinum™. Its server-based configuration enables several machines to work in parallel for processing higher volumes. The system installs easily in an afternoon and operators are up to speed in 15 minutes. A touch screen monitor provides easy access to both workstation computer and server. The system also includes label printer and barcode scanner for automatic customer chargeback.

Medium Volume Configuration: EZ-Flats™ Enhanced Manifesting System:

Designed for daily flats volumes in the 2000-4000 range, Enhanced utilizes the same workstation as Essential but adds Engineering Innovation's Chameleon Parcel-Processing Solution
