NPI Omega Mixed Mail Sorter (l) and Omega Letter Sorter

Fluence FlatsMgr Sorting System

WINSORT INPROCESSING: WinSort INProcessing is sorting software designed for Inbound Sorting Systems. With several decades of industry leading experience in sorting systems, Fluence has the widest range of capabilities for sorting incoming mail, covering several segments, including: Lockbox/remittance processing; Response management for mail and media; Incoming university mail; Incoming corporate mail; and Incoming government mail.

VOTE BY MAIL (VBM) SOFTWARE: VBM Data Review has been developed over years of working with county officials, built on platforms proven through decades of heavy-duty production mail processing. Fluence Automation offers affordable, practical solutions based on our advanced sorting platforms, that solve many of the most difficult mail ballot processing challenges. Unlike others, we design, build, and support our systems, and therefore control the long-term product direction.

MAINTENANCE SERVICES: Fluence has a nationwide service team, focused on ensuring that our products provide the best value to our customers. Most of our team members have 10+ years of experience and we pride ourselves in ensuring a strong relationship with our customers. In addition to the Fluence team, it continues to have a good relationship with the Bell and Howell service team, to cover areas where Bell and Howell has better coverage. Fluence products last several decades, often being used every working day, and sometimes 24 X 7. Some segments have very critical operational periods such as monthly/ quarterly/ annual statements, or in the case of Vote by Mail, election processing periods. In addition, some customers have their own in-house technicians, some rely on us to provide resident technicians while others follow a hybrid approach.

See Fluence's listing in the Barcoding/Sorting Systems section.

§ NPI

CATEGORY: Incoming Mail Systems
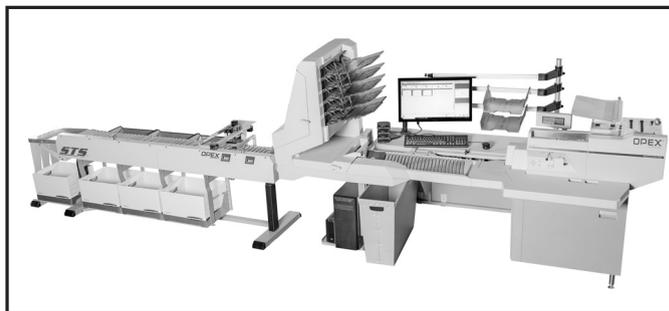

PRODUCT: NPI's Incoming Automated Mail Sorters

COMPANY: NPI, 14901 Trinity Blvd, Fort Worth, TX 76155. Key Contact: Michelle Benker. Phone: 888-821-SORT.

DESCRIPTION: NPI has been designing leading-edge mail sorters for over 35 years, with over 1,000 machines installed worldwide. NPI sets the standard for affordable, high quality, low maintenance machines, while meeting the highest expectations in automated mail sorting with the industry's most compact design. Our exclusive technology can be configured into a number of modular designs to meet specific customer requirements for labor, floor space and cost. NPI's products include Parcel, Letter and Flat (MLOCR/BCR) sorters with customizable options that's supported by 24/7 Service Support.

NPI BARCODE SORTERS: These sorters can be configured to sort incoming mail pieces. With database-driven incoming software, customers can process time-sensitive incoming mail such as lockbox operations and remittances, reducing cycle times and labor costs. Sort information is retrieved from a database and downloaded to the sort computer to target key fields. Interoffice mail can also be distributed more efficiently using inter-office software.

See NPI's Omega Sorter listing in Barcoding/Sorting Systems section.

CONTACT: For more information, call 888-821-SORT or email sales@npisorters.com.

OPEX Falcon STS

§ OPEX Corporation

CATEGORY: Incoming Mail Sorters

PRODUCT: OPEX Incoming Mail Sorters

COMPANY: OPEX Corporation, 305 Commerce Drive, Moorestown, NJ 08057. Tele: (856) 727-1100. Web: OPEX.com.

FALCON STS: OPEX's Falcon® STS™ is foundational to the success of your digital mail solution. This one-of-a-kind, multi-functional device
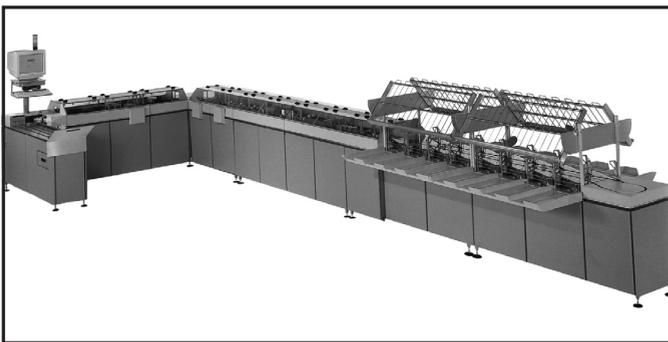

OPEX Mail Matrix

is designed for organizations looking to deliver their mail digitally. The STS allows mail centers to scan mail, apply barcode tracking to each envelope and deliver those images to end users. The end user decides what should be done with each item – for example, Scan and deliver electronically, Hold for pick up, Forward, or Destroy. These mail pieces are then sorted on STS per specific instructions from the end user. Mail that is approved by the end user to be opened and scanned can quickly and easily be processed on the Falcon STS with Rapid Extraction Desk and delivered electronically. It's the mail they need. The way they want it. Delivered wherever they are.

MAIL MATRIX: Mail Matrix® is truly revolutionary in both form and function. Using iBOT®s, wireless robotic vehicles, Mail Matrix distributes a wide variety of mail into a convenient array of delivery bins in a single pass. With a small footprint, high functionality, and cost-saving efficiency, Mail Matrix offers a powerful solution that meets the needs of mail centers in a variety of processing environments including corporations, universities, hospitals, service bureaus, election agencies, lockboxes, and many more.

MPS 40: One of the most efficient mailroom sorters in the industry, the Multi-Purpose Sorter (MPS) 40 can be easily upgraded and expanded as

OPEX MPS 40

your business grows. The MPS 40™ is a reliable mail processing solution, offering OPEX customers greater speed, various options and customized configurations. Integrated with OPEX's Exact Sequence Sort™, the MPS 40 becomes a fully automated mailroom solution for wholesale lockbox processing.

See OPEX's listings in the Digital Mail Systems, Document Processing, and Mail Openers/Extractors sections.

§ Tritek Technologies, Inc.

CATEGORY: Incoming Mail Sorters

PRODUCT: Tritek Sorting & Processing Equipment

COMPANY: Tritek Technologies, Inc., 1-B Medori Boulevard, Wilmington, DE 19801. Contact: Sales Email: info@tritektech.com Phone: 302-239-1638.

INBOUND SORTING SYSTEMS: No matter how you flip it, Tritek equipment can read it, sort it, store it and track it. The Tritek sorting machine is designed to read the address of all mail pieces regardless of what direction they are fed into our machine. Tritek has the only mail processing equipment that can read envelopes, magazines, newspapers, poly-wrapped pieces in any direction in a 12" x 17" viewing area, without adjustments, even on the front and backside of the mail piece! The recognition software captures an image of the entire document in grayscale. (Other reading applications can be integrated if desired.) The image can then be stored and tracked.

Read Address From Any Direction

INBOUND SORTING FEATURES: Process letters or flats in up to 1024 USPS mail bins. Tritek's patented transport is the only machine that can process postcards, letters, flats and newspapers and sort them into your custom configuration of bins - up to 1024. Reads OCR, barcodes, type, script font and handwritten addresses. All Tritek sorters feature advanced Optical Character Recognition and bar code printing capabilities which enable our systems to automate even hand written addresses and to print the destination bar code on the mail piece during the sorting process. Whether your inbound mail address is typed or handwritten, Tritek's sorting machine can easily read and sort for you! Tritek advanced "read technology" sorters interpret script fonts and handwritten addresses.

TRITEK COMPACT: The Tritek Compact Series Equipment features a small footprint size for letter mail, flats and document processing. The compact design allows for large imaging over 300 dots per inch scanned omni directionally. Tritek's 12" inch by 17" inch scan area enables entire 8.5" by 11" inch documents to be scanned. It also scans legal sized documents. The Compact series is designed to time and date stamp documents and mail. It is Sarbanes Oxley compliant - a record is created and stored to a file. These records can

Tritek Compact Elite

then be searched or emailed whenever required. The mail piece is duplex scanned front and back side as well as documents.

COMPACT ELITE: The Compact Elite is designed for email processing and imaging. The scan area enables complete front and back side imaging. These images are stored, time and date stamped for records retention or email delivery. The small footprint Compact Elite features large scale imaging in a compact machine size. The Compact Elite is less than
