inserting processes and ensure the mail piece reaches the intended recipient.

**OMS-500:** OMS-500 is an output management solution that runs entirely in the cloud or on-premise, which allows users to manage important customer communications easily and securely in different media. This solution operates on the award-winning Quadient platform which provides the highest level of performance and scalability. OMS-500 automates and centralizes the document preparation process which helps users increase operational efficiencies and ensure that content is sent to the right person, at the right time through the customer’s preferred channel. OMS-500 also allows users to add specific marketing messages and merge multiple documents into a single envelope, allowing for increased marketing opportunities and savings on printing and postal costs. It integrates with Quadient Data Quality software to provide preset capabilities and ensures customer contact data integrity. In addition, OMS-500 integrates with ConnectSuite e-Certify and e-Preference solutions. These unique and powerful Web-based plug-ins enable businesses to centralize and track the processing of Certified Mail and allow customers to manage their recipients’ delivery preference to easily evolve from paper-based communications to digital delivery.

**Quadient INSPIRE:** Inspire is an enterprise communication platform enabling your business to deliver relevant personalized messages, at the right time through the preferred channel. It includes a high performance document composition engine on a flexible platform that integrates with almost any data source. Quadient Inspire’s efficient template design is optimized for multi-channel communication and boasts robust reporting capabilities to track production in real time. Quadient Inspire will help decrease costs, increase operational efficiencies and improve customer satisfaction. See Neopost’s listing in the Database/Postal Software section.

### § Pitney Bowes Inc.

**CATEGORY:** Document Software

**PRODUCT:** Relay® Hub

**COMPANY:** Pitney Bowes Inc., 3001 Summer Street, Stamford, CT 06926-0700. Tele: 877-682-7687. Web: PitneyBowes.com

**RELAY HUB:** The Relay Hub, from the Pitney Bowes Commerce Cloud, lets you enhance your critical customer documents to reduce mailing costs, improve customer engagement and increase paperless adoption. The Relay Hub is a SaaS solution that leverages the proven enterprise software with the scalability of AWS to deliver powerful digital document management. Decrease mailing costs by correcting address data, presenting mail, and adding barcodes precise automated folding and inserting. Leveraging the power of SaaS and a simple print drive, Relay Hub also allows businesses to easily centralize and control customer communications from anywhere to capitalize on their existing mailing investments. Working with outputs from your existing systems, you get the flexibility to modernize your documents with color and updated branding to make communications easier to understand and faster to respond to. Increase paperless by easily transitioning printed documents to digital sending, like email, while keeping document design intact for a seamless customer experience across channels. See Pitney Bowes listing in the Database/Postal Software section.

### § OPEX Corporation

**CATEGORY:** Document Processing Systems

**PRODUCT:** OPEX Falcon®, FalconV™, Falcon® RED™

**COMPANY:** OPEX Corporation, 305 Commerce Drive, Moorestown, NJ 08057. Tele: (856) 727-1100. Web: OPEX.com.

**FALCON:** The OPEX® Falcon enables operators to prep and scan documents in a single step, greatly reducing the number of labor steps associated with the scanning process. The Falcon’s revolutionary feeder design can process stacks of sheets as small as 2” x 3.5” and as large as 12.25” x 25.5” - providing a truly universal scanning solution. Once scanned, documents move into one of three programmable outsort bins for improved sorting.
Document Processing Systems

**ROLLEM**

**FALCON V**: FalconV uses OPEX’s one-touch scanning process to take on the most difficult workflow challenges, significantly reducing labor costs and improving productivity. From business cards to newspapers, the FalconV can scan in full color and feed at speeds of up to 115 pages per minute. FalconV features five programmable bins for accurate document sortation.

**FALCON RED**: Falcon RED combines OPEX’s innovative one-touch document scanner with the most efficient mail opening and extraction unit on the market. The Falcon RED can scan documents straight from the envelope in one touch using just one operator. This Universal Document Scanning Workstation™ can be equipped with a MICR reader to process payments and document together, perfect for retail and wholesale lockbox operations.

See OPEX's listings in the Digital Mail Systems, Incoming Mail Sorters, and Mail Openers/Extractors sections.

**ROLLEM International**

**CATEGORY**: Document Processing Systems

**PRODUCT**: Mailstream Mail Finishing System; Insignia Die Cutter

**MAILSTREAM**: Print, finish, and mail 10-in-one. Mailstream, a new direct mail finishing system, converts press sheets to finished mail products while maintaining zip code order. Apply 10 processes in one operation including hot, cold and fugitive glue; tear-off coupons; tip-on cards; trimming, slitting, scoring, pattern-perforations, and scratch-off labels. Mail integrity is maintained creating folded, glued products ready for delivery to mail bins. Glue closures meet USPS requirements and also eliminate the need for wafer seals. In-line and near-Line configurations are available.

**APPLICATIONS**: Mailstream is ideal any lettershop, mail center or office services environment, including that of banks, colleges and universities, government offices, insurance companies, and telecoms.

**INSIGNIA DIE CUTTERS**: The Insignia Series of die cutter is a new class of sheet-fed rotary die cutter, ideal for producing labels, packaging, and unique mail applications. The machine is capable of die-cutting, kiss-cutting, perforating, scoring, and cut-scoring on a range of papers, plastics, magnetic material, PVC, styrene and polypropylenes up to 24 pt. in thickness. Key features include run speeds up to 5,000 sph, ease of operation and quick changeover. Insignia is available in two sizes, Insignia5 handles digital sheet sizes 20x15", and Insignia7 handles B2 size 24x30" sheets. Insignia is ideal for promotional products, garment and industrial tags and labels, shaped direct mail, photo products, pocket folders, folded cartons, stickers, and the list goes on. The flexo-magnetic dies are a simple change over from job to job and the machine is easy to operate. To meet varying application requirements, Insignia is available in either single or dual magnetic cylinder configurations. For additional information, see Die Cutting section.
